Introduction

The information contained within this booklet forms part of the regular analysis of demographic and related changes carried out by Cambridgeshire County Council's Research and Performance Team to help the planning of local authority and other services.

This booklet provides the following information:

- Mid-year estimates of the total population of parishes, city wards, rural wards and districts within Cambridgeshire for mid-2013.
- Estimates of the total population of settlements contained within, or divided between, Cambridgeshire parishes, for mid-2013.
- Nationally produced population estimates for Local Authority Districts for mid-2013.
- Mid-year estimates of the number of dwellings in parishes, city wards, rural wards and districts for mid-2013.
- Census 2011 figures, and percentage changes from these years, are provided as comparisons for all of the above.

The information contained in this report is also available in spreadsheet format on the County Council's website – www.cambridgeshireinsight.org.uk.

Mid-2013 estimates

Cambridgeshire County Council Research and Performance Team produce mid-year population and dwelling estimates each year. Mid-year estimates for inter-census years (2012-2013 looking back and 2014-2021 looking forward) are based on Census figures produced by ONS (see Notes for Users on page 5 for full details on population estimates).

The estimates in this document are based on the 2011 Census, and, as a result of this rebasing, some estimates will not reflect the same direction of change that previous estimates showed. This is due to inaccuracies that accumulate as estimates are produced further from a base census year (i.e. in the 2011 estimates), and not to actual changes in the reported geographies, or the methodology used. As such the comparison figures reported here are from the 2011 Census, and not Research and Performance Team (R&P) estimates, as in estimates from recent years.

Users of this report are strongly encouraged to read the 'Notes for Users' section. In particular, users are reminded that year-on-year variations in population and dwelling estimates, particularly for smaller parishes and settlements, may not reflect real changes but rather be the result of technical adjustments, rounding effects or random variations in the coverage of administrative sources such as electoral registers.

Summary and analysis of population

Table 1: Cambridgeshire and Districts population estimates mid-2013

Local Authority Area	2011 census	2012 Mid-year estimate	2013 Mid-year estimate	% Change 2011-2013	% Change 2012-2013
Cambridge City	123,900	126,500	128,000	3.3%	1.2%
East Cambridgeshire	83,800	84,700	85,600	2.1%	1.1%
Fenland	95,300	95,600	95,600	0.3%	0.0%
Huntingdonshire	169,500	171,100	175,700	3.7%	2.7%
South Cambridgeshire	148,800	149,300	150,200	0.9%	0.6%
Cambridgeshire	621,200	627,200	635,100	2.2%	1.3%

Source: CCC R&P 2013 mid-year estimates & ONS 2011 Census figures.

Totals may not add due to rounding

Since 2011 the population of Cambridgeshire has increased by 2.2% to 635,100. There has been a 1.3% increase in the last year. Huntingdonshire has had the largest percentage increase, both since the 2011 census (3.7% growth) and since 2012 when it has seen 2.7% population growth. The smallest percentage change for 2012-2013 was Fenland, where the population remained the same as in 2012.

Cambridgeshire's settlement pattern is dominated by Cambridge City, which accounts for 20% of the County's population. Most settlements are small, with only 19 of Cambridgeshire's 238 parishes (including Cambridge) having populations larger than 5,000 residents, and only ten cities/parishes with more than 10,000. Three fifths (60%) of Cambridgeshire's population live in those 19 parishes (Table 2).

The 2013 mid-year estimates show that the development in the new parish of Cambourne now places it above Littleport in order of ranked population size compared to 2012.

Table 2: Cities/parishes with populations of 5,000 or more, mid-2013

Rank	City/Parish	Population	Rank	City/Parish	Population
1	Cambridge City	128,030	11	Yaxley	9,630
2	St Neots	32,730	12	Cambourne	9,600
3	Wisbech	26,480	13	Littleport	9,040
4	Huntingdon	24,810	14	Ramsey	8,690
5	March	22,230	15	Sawston	7,180
6	Ely	20,600	16	Godmanchester	6,940
7	St Ives	17,280	17	Burwell	6,410
8	Whittlesey	16,300	18	Cottenham	6,070
9	Soham	11,460	19	Sawtry	5,360
10	Chatteris	10,600

Notes for Users

1) Total population estimates

Definition: The total population figures are estimates of the usual resident population. The definition of the usual resident population used for our mid-year estimates is the same as that used in the 2011 Census as all students (including school boarders) are counted as resident at their term time address. The population estimates include persons living in communal establishments as well as those in private households.

The population estimates are only as reliable as the sources and methods used to produce them. Certain parishes and wards, particularly those with large numbers of armed forces (marked AF on the tables) or students, are more difficult to estimate in terms of population size and figures are also likely to fluctuate more.

Method: The population estimate is rolled forward one year at a time, taking the change in population from one year to the next and adding it to the last estimate. The sources used to compile these annual change figures cover the whole population age range: electoral registers for the adult population (including European electors from 1995 onwards); school rolls for the school-aged population and health service statistics on children aged 0-4 and the older population. Additional sources are used to monitor groups for which coverage is otherwise incomplete or uncertain. These include our own surveys for the population associated with local armed forces bases, higher education establishments, independent schools and other institutions such as nursing and residential homes and prisons.

Reliability of Sources: There are a number of problems associated with the compilation of the electoral register that affect its reliability for producing population estimates. At intervals there is a tidying up process whereby the names of people who have died or moved away are removed from the electoral register and attempts are made to increase the level of registration of 17 year olds (“attainers”) and other sub-groups of the population. Changes also occur in the general practice of canvassing for the electoral roll. Consequently, changes in a particular area may occur in the number registered to vote that appear inconsistent with other indicators such as the number of new housing completions.

As a general rule, the longer the period over which population changes are analysed, and the larger the settlement, the more reliable the results are likely to be. Particular care should be taken in using the figures for the following types of areas:

Areas with large numbers of armed forces and their families – with the closure of several bases there are much fewer armed forces personnel in the county. The electoral register is a poor indicator of changes in numbers of service personnel and their families living in an area. Low registration levels reflect high turnover among those entitled to vote. In addition, American service personnel and their families are not entitled to vote so changes at the USAF bases are not recorded on the electoral register. An annual survey of armed forces attempts to monitor the changes by direct contact with bases. This together with information from the Ministry of Defence is used to adjust the estimates where it is clear that our usual sources give a poor indication of change. Unfortunately, this source is itself often incomplete, particularly with regard to families of armed forces and those living in accommodation off the base.

Areas with large numbers of students - experience suggests that many students, especially those living in privately rented accommodation, are not entered on the electoral register. Students from overseas may not be eligible for registration. Figures from educational establishments help in recording changes in the student population not fully covered by electoral roll change.

2) Population estimates for settlements

Definition: There is no official list of settlements or officially agreed settlement boundaries – those calculated for Cambridgeshire have been defined as being reasonably distinct from at least one other built up area within a parish, and having a population of at least 50. Settlements do not tend to include people living outside the built up area.

Source: Settlements have been defined using registration units from the electoral register in conjunction with detailed local maps. Population estimates for settlements have been produced by apportioning the parish population on the basis of Ordnance Survey Address-Point® records. Our annual survey of armed forces populations normally helps us allocate numbers of those not adequately covered by the electoral register. Respondents of this survey did not return base populations in time to create the mid-2013 estimates. As there have been a number of base closures large reductions to populations can be expected in these areas, so previous population figures for bases have not been carried forward.

Reliability: The methodology used for calculating settlements has been revised following the 2011 Census and comparison with previous estimates is not advisable.

3) Dwelling stock estimates

Definition: Estimates of dwelling stock relate to the number of self-contained residential units whereby, if there is more than one separate area of living accommodation within a property, each is counted separately. Vacant properties, second homes and holiday homes are included, as are non-permanent dwellings, such as caravans and houseboats (where these are used as dwellings).

Method: The 2011 Census provided a count for the number of dwellings by parish and urban ward, and these are the basis for the 2013 mid-year estimates. Estimates have been calculated using housing completions data (supplied by the Research and Monitoring section of the County Council) to record change since the Census.

Reliability of sources: Due to the changes in methodology adopted in recent years, comparisons with data from previous years should be undertaken with some measure of caution.

3) Rounding of the figures

Figures for parishes and wards have all been rounded to the nearest 10 people and may not add to district totals. District totals are all rounded to the nearest 100. This reflects the level of accuracy of the results.

4) Further information

Further information can be obtained from the Research and Performance Team on Cambridge (01223) 715300 or via email: research.performance@cambridgeshire.gov.uk

Note: The Fenland (Electoral Changes) Order 2014 sets out new ward boundaries to come into effect for the May 2015 elections. Subsequently changes to parish boundaries have also been agreed. These estimates are based on the original boundaries. Future estimates will take account of these changes.

Figures may not add to totals due to rounding.

+ A review of parish boundaries in 2010 led to significant boundary changes. The changes with population impacts are summarised as follows:

- Abbotsley now includes part of discontinued Eynesbury Hardwick and St Neots Rural parishes.
- Hamerton & Steeple Gidding parish was formed by joining the former parishes of Hamerton and Steeple Gidding.
- The old Houghton & Wyton parish was split, with the RAF Wyton site transferred to the new Wyton-on-the-Hill parish
- The new parish of Offord Cluny & Offord D'Arcy was formed from the former parishes of Offord Cluny and Offord D'Arcy.
- Approximately 100 people were transferred from Fenstanton parish to Saint Ives parish.
- The new parish of Waresley-cum-Tetworth was formed from the former Tetworth and Waresley parishes.
- St Neots parish now includes part of the urban extent of the town that previously fell in Eynesbury Hardwick and St Neots Rural parishes, including the Love's Farm development.
- Huntingdon parish now includes all the Hinchingsbrooke development, part of which previously fell in The Stukeleys parish

(AF) Parishes with a large armed forces population which generally accounts for large changes.

Figures may not add to totals due to rounding.

* In 2010, Huntingdonshire undertook adjustments to the wards formed by the District of Huntingdonshire (Electoral Changes) Order 2002. The majority of changes to wards were minor and did not affect populated areas. The only significant ward change, in population terms, was the transfer of part of Gransden & the Offords ward to St Neots Priory Park ward. This change "moved" the Love's Farm development, which is on the edge of the urban extent of St Neots, from a rural ward into one of the town's existing wards, but very few existing homes. As such, changes are mainly seen in the St Neots Priory Park ward after 2001 as the Loves Farm development had not yet commenced at the time; it is therefore still valid to compare the 2001 and 2010 populations for Gransden and the Offords.

Figures may not add to totals due to rounding.

		Remaining population	50

(pt) Part of settlement contained within another parish.

(AF) Parish / settlement with a significant proportion of armed forces accommodation.

These are the new wards within St Neots, which do not correspond exactly to previous settlement estimates.

Some settlements have been affected by the parish and ward boundary changes of 2010. St Neots fringe, formerly in Eynesbury Hardwick, has become part of St Neots, with the remaining population going into Abbotsley; Wyton-on-the-Hill parish was created from a section of Houghton and Wyton parish; and the Hinchingsbrooke Park area of The Stukeleys has become part of Huntingdon.

Figures may not add to parish totals due to rounding.

(pt) Part of settlement contained within another parish.

(AF) Parish / settlement with a significant proportion of armed forces accommodation.

Settlement estimates have been rebased to reflect the 2011 Census and are not comparable with previous estimates.

Figures may not add to parish totals due to rounding.

Nationally produced population estimates for Cambridgeshire

Nationally produced population estimates for Cambridgeshire mid-2013

The Office for National Statistics (ONS) produces annual estimates of the country's population by Local Authority District. Cambridgeshire County Council's Research and Performance Team (R&P) independently produces its own estimates (published here), which are not controlled to the ONS figures. The main reason for doing this is that it is possible to feed in local information on changes in armed forces, students, school rolls etc. Consequently there will be differences between the R&P estimates and the ONS estimates.

While R&P advises the use of their own estimates for most purposes, some statutory purposes require the use of the official government figures. They are presented below for this purpose. A more detailed breakdown of the figures (by age and sex) is available from R&P.

Table 2: ONS Mid-2013 population estimates compared with Research & Performance Team estimates

District	ONS Population Estimate 2013	CCC Research & Performance Estimate 2013	% Difference (CCC to ONS)
Cambridge City East	126,700	128,000	1.0%
Cambridgeshire	85,900	85,600	-0.4%
Fenland	96,700	95,600	-1.2%
Huntingdonshire South	172,000	175,700	2.1%
Cambridgeshire	151,400	150,200	-0.8%
Cambridgeshire	632,800	635,100	0.4%

*ONS has recently circulated a correction to its original 2013 set of estimates as it had miscalculated the armed forces population in certain areas. The figures above are the corrected figures. Please note that the published figures may be different.

Since 2011 ONS has introduced revisions to its methodology for measuring international immigration. The latest methodology is an improvement on previous methods, which had resulted in much lower estimates for Cambridge City.

+ A review of parish boundaries in 2010 led to significant boundary changes. The changes with population impacts are summarised as follows:

- Abbotsley now includes part of discontinued Eynesbury Hardwick and St Neots Rural parishes.
- Hamerton & Steeple Gidding parish was formed by joining the former parishes of Hamerton and Steeple Gidding.
- The old Houghton & Wyton parish was split, with the RAF Wyton site transferred to the new Wyton-on-the-Hill parish
- The new parish of Offord Cluny & Offord D'Arcy was formed from the former parishes of Offord Cluny and Offord D'Arcy.
- Approximately 100 people were transferred from Fenstanton parish to Saint Ives parish.
- The new parish of Waresley-cum-Tetworth was formed from the former Tetworth and Waresley parishes.
- St Neots parish now includes part of the urban extent of the town that previously fell in Eynesbury Hardwick and St Neots Rural parishes, including the Love's Farm development.
- Huntingdon parish now includes all the Hinchingsbrooke development, part of which previously fell in The Stukeleys parish

(AF) Parishes with a large armed forces population which generally accounts for large changes.

Dwelling figures may not add to totals due to rounding.

* The parish of Cambourne was created by the Parish of Cambourne Order 2004, resulting in a number of Bourn dwellings and residents to be re-allocated to the new parish.

(AF) Parishes with a large armed forces population which generally accounts for large changes.

~The parish of Orchard Park was created under section 4 of the South Cambridgeshire District Council (Reorganisation of Community Governance Order) 2009. It formally came into existence on 1st April 2009.

Dwelling figures may not add to totals due to rounding.

*These are new wards resulting from the District of Fenland (Electoral Changes) Order 2002. The Fenland (Electoral Changes) Order 2014 sets out new ward boundaries to come into effect for the May 2015 elections. Subsequently changes to parish boundaries have also been agreed. These estimates are based on the original boundaries. Future estimates will take account of these changes.

Dwelling figures may not add to totals due to rounding.

Source: CCC R&P 2012 and 2013 mid-year estimates & ONS 2011 Census figures

In 2010, Huntingdonshire undertook adjustments to the wards formed by the District of Huntingdonshire (Electoral Changes) Order 2002. The majority of changes to wards were minor and did not affect populated areas. The only significant ward change, in population terms, was the transfer of part of Gransden & the Offords ward to St Neots Priory Park ward. This change "moved" the Love's Farm development, which is on the edge of the urban extent of St Neots, from a rural ward into one of the town's existing wards, but very few existing homes. As such, changes are mainly seen in the St Neots Priory Park ward after 2001 as the Loves Farm development had not yet commenced at the time; it is therefore still valid to compare the 2001 and 2010 populations for Gransden and the Offords.

Dwelling figures may not add due to rounding.
