

Annual review of the Public Health Outcomes Framework, Cambridgeshire, May 2017

Notes:

- The following tables present an annual review of the PHOF for Cambridgeshire as at May 2017.
- The latest available red-amber-green (RAG) ratings are shown for each indicator alongside the most recent previous rating.
- The period that data relate to and the frequency and timeliness of publication varies with each indicator and data may not necessarily have been updated during the previous year.
- Most RAG-ratings are based on benchmarking local values against an England average, but some are rated against target values or percentiles - full details can be found in the PHOF Data Tool at www.phoutcomes.info.
- A direction of travel indicator is shown based on any change in RAG-rating between the two periods presented. It should be recognised, however, that changes in RAG-ratings may not necessarily reflect favourable or unfavourable changes in the local indicator value.
- More information on longer term trends, including indicator values, is available via the Trends tab of the PHOF Data Tool at <http://www.phoutcomes.info/public-health-outcomes-framework#page/4/gid/1000049/pat/6/par/E12000006/ati/102/are/E10000003/iid/90362/age/1/sex/1>
- The tables exclude indicators which apply to England-level data only.
- It should be noted that county level ratings may mask district-level variation also presented in PHOF, and small area level variation presented elsewhere.
- Notes of particular importance to the interpretation of some indicators are footnoted after the main tables.

Data in the PHOF are updated quarterly by Public Health England in February, May, August and November at www.phoutcomes.info. Each update refreshes indicators for which new figures have become available during the previous quarter. Cambridgeshire and Peterborough Public Health Intelligence produce a local commentary for Cambridgeshire and its districts which highlights the key changes each quarter – this can be found at <http://cambridgeshireinsight.org.uk/health/phof>.

Summary:

Number and percentage of indicators by direction of travel: latest RAG-rating compared to previous RAG-rating, Cambridgeshire, May 2017

Direction of travel	Number	Percentage
 Better than previous RAG-rating	13	6.7
 Same as previous RAG-rating	158	81.9
 Worse than previous RAG-rating	22	11.4
Total	193	100

List of indicators with a 'worse' RAG-rating in the latest data

- 1.08iv - Percentage of people aged 16-64 in employment (males)
- 1.09i - Sickness absence - the percentage of employees who had at least one day off in the previous week
- 1.09ii - Sickness absence - the percent of working days lost due to sickness absence
- 1.18ii - Social Isolation: percentage of adult carers who have as much social contact as they would like

- 2.07ii - Hospital admissions caused by unintentional and deliberate injuries in young people (aged 15-24 years)
- 2.13i - Percentage of physically active and inactive adults - active adults
- 2.14 - Smoking Prevalence in adults - current smokers (APS)
- 2.15i - Successful completion of drug treatment - opiate users
- 2.18 - Admission episodes for alcohol-related conditions - narrow definition (females and persons)
- 2.24ii - Emergency hospital admissions due to falls in people aged 65 and over - aged 65-79 (persons)
- 2.24iii - Emergency hospital admissions due to falls in people aged 65 and over - aged 80+ (females and persons)
- 3.03vi - Population vaccination coverage - Hib / Men C booster (5 years old)
- 3.03xvii - Population vaccination coverage - Shingles vaccination coverage (70 years old)
- 3.03xviii - Population vaccination coverage - Flu (2-4 years old)
- 4.08 - Mortality rate from a range of specified communicable diseases, including influenza
- 4.09i - Excess under 75 mortality rate in adults with serious mental illness
- 4.11 - Emergency readmissions within 30 days of discharge from hospital
- 4.12i - Preventable sight loss - age related macular degeneration (AMD)
- 4.12iv - Preventable sight loss - sight loss certifications
- 4.14iii - Hip fractures in people aged 65 and over - aged 80+ (persons)

List of all currently red RAG-rated indicators for Cambridgeshire

- 1.02i - School readiness: the percentage of children with free school meal status achieving a good level of development at the end of reception (Persons, Females)
- 1.02ii - School readiness: the percentage of Year 1 pupils achieving the expected level in the phonics screening check (All children and children with free school meal status) (Persons, Males and Females)
- 1.06i - Adults with a learning disability who live in stable and appropriate accommodation (Persons, Males and Females)
- 1.06ii - Adults in contact with secondary mental health services who live in stable and appropriate accommodation (Persons, Males and Females)
- 1.08ii - Gap in the employment rate between those with a learning disability and the overall employment rate (Persons, Males and Females)
- 1.08iii - Gap in the employment rate for those in contact with secondary mental health services and the overall employment rate (Persons, Males and Females)
- 1.09i - Sickness absence - the percentage of employees who had at least one day off in the previous week
- 1.09ii - Sickness absence - the percent of working days lost due to sickness absence
- 1.10 - Killed and seriously injured (KSI) casualties on England's roads
- 2.07ii - Hospital admissions caused by unintentional and deliberate injuries in young people (aged 15-24 years)
- 2.10ii - Emergency hospital admissions for intentional self-harm
- 2.15 - Successful completion of drug treatment - opiate users
- 2.15ii - Successful completion of drug treatment - non-opiate users
- 2.18 - Admission episodes for alcohol-related conditions - narrow definition (Female)
- 2.20ii - Cancer screening coverage - cervical cancer
- 2.22iv - Cumulative percentage of the eligible population aged 40-74 offered an NHS Health Check who received an NHS Health Check
- 2.22v - Cumulative percentage of the eligible population aged 40-74 who received an NHS Health check
- 2.24iii - Emergency hospital admissions due to falls in people aged 80+ (Persons, Females)

- 3.02 - Chlamydia detection rate (15-24 year olds)
- 3.03vi - Population vaccination coverage - Hib / Men C booster (5 years old)
- 3.03x - Population vaccination coverage - MMR for two doses (5 years old)
- 3.03xiv - Population vaccination coverage - Flu (aged 65+)
- 3.03xv - Population vaccination coverage - Flu (at risk individuals)
- 3.03xviii - Population vaccination coverage - Flu (2-4 years old)
- 3.05i - Treatment completion for TB
- 4.08 - Mortality rate from a range of specified communicable diseases, including influenza (Female)
- 4.09ii - Proportion of adults in the population in contact with secondary mental health services

Keys for main tables

Key to RAG-ratings

	Statistically significantly better than the England average or above target
	Statistically similar to the England average or similar to target
	Statistically significantly worse than the England average or below target

Key to direction of travel

- 😊 Better than previous RAG-rating
- 😐 Same as previous RAG-rating
- 😞 Worse than previous RAG-rating

4.12ii - Preventable sight loss - glaucoma	Persons	2013/14		2014/15		☹️
4.12iii - Preventable sight loss - diabetic eye disease	Persons	2013/14		2014/15		☹️
4.12iv - Preventable sight loss - sight loss certifications	Persons	2013/14		2014/15		☹️
4.13 - Health related quality of life for older people	Persons	2014/15		2015/16		☹️
4.14i - Hip fractures in people aged 65 and over	Female	2014/15		2015/16		☹️
	Male	2014/15		2015/16		☹️
	Persons	2014/15		2015/16		☹️
4.14ii - Hip fractures in people aged 65 and over - aged 65-79	Female	2014/15		2015/16		☹️
	Male	2014/15		2015/16		☹️
	Persons	2014/15		2015/16		☹️
4.14iii - Hip fractures in people aged 65 and over - aged 80+	Female	2014/15		2015/16		☹️
	Male	2014/15		2015/16		☹️
	Persons	2014/15		2015/16		☹️
4.15i - Excess winter deaths index (single year, all ages)	Female	08/2013-07/2014		08/2014-07/2015		☹️
	Male	08/2013-07/2014		08/2014-07/2015		☹️
	Persons	08/2013-07/2014		08/2014-07/2015		☹️
4.15ii - Excess winter deaths index (single year, age 85+)	Female	08/2013-07/2014		08/2014-07/2015		☹️
	Male	08/2013-07/2014		08/2014-07/2015		☹️
	Persons	08/2013-07/2014		08/2014-07/2015		☹️
4.15iii - Excess winter deaths index (3 years, all ages)	Female	08/2011-07/2014		08/2012-07/2015		☹️
	Male	08/2011-07/2014		08/2012-07/2015		☹️
	Persons	08/2011-07/2014		08/2012-07/2015		☹️
4.15iv - Excess winter deaths index (3 years, age 85+)	Female	08/2011-07/2014		08/2012-07/2015		☹️
	Male	08/2011-07/2014		08/2012-07/2015		☹️
	Persons	08/2011-07/2014		08/2012-07/2015		☹️

Footnotes

1. It is difficult to accurately assess change over time for this indicator as it is known to have been highly influenced by a change in data collection and definition. The data for 2014/15 only include those whose reviews were completed in the previous year in the numerator and so data are not strictly comparable over time.
2. It should be noted that employment rate gaps in Cambridgeshire may be adversely affected by the county's generally higher than average employment rate in the general population - see contextual indicator 1.08iv.
3. This indicator is partly influenced by the high levels of through-traffic on major roads through the county and many people killed or injured may not be Cambridgeshire residents.
4. These indicators have been locally RAG-rated and are not RAG-rated in PHOF. These measures are known to be influenced by variation in recording practice and so should be interpreted with caution.
5. These indicators have been RAG-rated locally and are not RAG-rated in PHOF.
6. Data for 2012/13 relate to NHS Cambridgeshire PCT and for 2013/14 to NHS Cambridgeshire and Peterborough CCG; the values and RAG-rating should not therefore be compared.
7. It should be noted that a low detection rate could indicate either low screening coverage or low levels of infection in the population - RAG-rating is based on a current PHE target. Data by sex are locally RAG-rated.
