"Making the difference,  
by being the difference"

What's your experience? Did you fall through the gaps in the system? Do you want to make things better?

We are a group of people with lived experience such as mental health, homelessness, domestic violence, contact with the criminal justice system and substance misuse.

We think improvements can be made to these support systems around these subjects and this is our mission.

We work with organisations and professionals involved in these support systems to share our experience and influence improvements for the future.

*Refreshments & Snacks from 1pm*

***Your experience counts!***
